

Nova

Introducing a timeless collection

Nova is a collection of timelessly designed chairs. It comes in many versions, all equally stylish. Nova has two different back heights, and almost everything about it can be varied, from the shell and the frame to fabric and armrests. The range of colours, materials and options mean you can configure your Nova to stand out or blend in. Either way, this chair is guaranteed to suit your style. The clean, soft curves and the firm, slightly angled back make Nova an obvious choice for the conference room, auditorium, dining room or lounge. Neat and elegant, it's easy to move and stack, not to mention hard-wearing. The almost infinite possibilities to customise Nova to suit your needs, taste and interior design means you will get a lot of chair for your money.

Enough options for everyone

Our most popular chair is customisable from top to toe. Nova has a moulded shell with the shape of the back designed for comfortable back and lumbar support.

The seat shell comes in two back heights, the higher version with a slightly rounded top. Your choice of shell sets the mood as you choose between oak, laminate or different ash finishes. There is also the

option of having the seat shell fully or partly upholstered. There are Nova options to suit every taste.

One chair, infinite style

Mix it up

Nova is a chair with infinite styling options. Combining different shells with our range of frames. The

frames come in a range of designs and materials. Four legs, sledge base and swivel base. Materials

include ash, oak, metal and chrome. Armrests can be closed or open.

Frame

Nova wood frame Ø16 mm
Frame in natural oak (E5), ash white 2% (A2) and black-stained ash (AS).

Nova 4 legs without armrests Ø16 mm

A green chair

The Nova manufacturing process is green, every step of the way from raw material to finished piece of furniture. The wooden parts of your Nova chair are made from FSC®-certified wood, which means they are manufactured responsibly, respecting the forest and social issues. The chair complies with the Nordic Swan Ecolabel's criteria for raw materials such as wood, metal, stuffing, plastic and also chemicals.

Nova has been declared compliant with and approved under Möbelfakta criteria on quality, the environment and social responsibility.

At EFG we are constantly striving to minimise our environmental footprint and to use energy and resources as efficiently as possible. We set high standards for ourselves and our suppliers when it comes to

the environment and working conditions. We take care in choosing materials that fulfil current ecolabelling criteria. We have ambitious environmental objectives and constantly monitor them to improve our processes. Read more about EFG's work on sustainability in our sustainability report.
