

SAVO®

SAVO JOI

Sit different. Feel different.

Sit different. Feel different.

The multifunctional Joi gives the user complete freedom of movement. As an alternative to traditional office chairs, it helps the user to stay active throughout the day. It works great in a seated position and also provides excellent support for those who prefer to stand while working.

Anyone who has trained with a pilates ball will get the point of the Joi. The feeling is a bit like training while working.

Flexibility and rotation stimulates micro-movements of the back, which is kept straight, relaxed and stable. The stool relieves the legs and straightens the back.

The Joi supports its user in meetings, workshops and spontaneous conversations, contributing to well-being in the workplace.

Joi - Sit different. Feel different.

Easy to use. Suitable for all.

Joi provides a comfortable balance and keeps the body in a naturally straight, yet relaxed position. As it facilitates excellent freedom of movement, stiffness and tension in the body are reduced. Pure joy for tired office backs!

Up and down, back and forth, rotating right or left or even in a full circle. The unique balance base with 360 degree "joystick" swiveling radius, allows the body to be in motion while working. Finding the correct angle between your hips and your back is almost done automatically.

Product features and options:

- Multi directional movement, achieve angles up to 17 degrees.
- Adjustable seat height 580-790 mm, adjusted intuitively via the circular lever.
- Size of base Ø 415 mm, seat Ø 360 mm.
- Stability is ensured via the weighted base.
- CMHR-foam available as an option.
- Three different standard colours on the base.
- Flexible design with a wide selection of fabrics for the seat.
- Total weight: 9 kg

We are designed for movement.

When we design Savo products, the human body is naturally at the centre – both physically and mentally. It is a philosophy that we have followed since its inception in 1945 when we designed our first office chair.

The idea with Joi was to create a stool on which you can move as you please, without being limited in any direction. A stool that would fit into today's modern and active working environments, which are constantly changing and where the interiors need to be intuitive enough to be used by different people through out the day.

With its small "visual foot print" the Joi blends in perfectly in any environment - from offices and meeting rooms to waiting and lounge areas.

Endless choices of fabrics.

The wide variety of standard colours and materials will help you create a truly personalized work environment with your Joi. Should you wish for an even more customized look, we also offer the opportunity to order specially adapted colours.

You decide.

Our full assortment is available on the [Savo website](#).

With five star base as an option.
