

Savo Joi

Savo Joi is a stool with a simple and modern design. The shape of the seat, combined with the small five star base or the flat metal base suits most environments. The fully upholstered seat encourages active sitting, similar to sitting on a ball. This, in turn, leads to active and dynamic use of back muscles.

The stool is user friendly and also ergonomically adapted.

Savo Joi is suitable for short periods of sitting, at high or lower height. Typical uses are project areas or temporary work stations.

FUNCTIONS

- Savo Joi with swivel base

- Standard seat height, adjustable 460-610 mm
- Low seat height, adjustable 390-510 mm as an alternative (also available in seat height 590-800mm, see Joi high chair)
