

SAVO®

SAVO 360

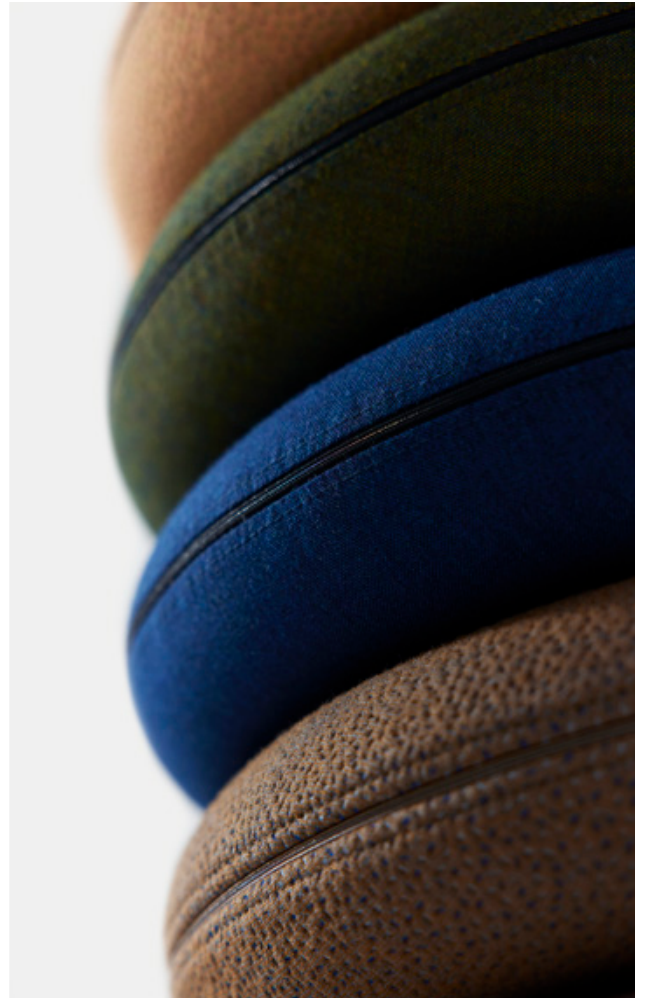

THIS IS  
**SAVO 360**

We provide the best seating experience all day. Every day. Our chairs are all about ergonomics from the very first second, and make sitting comfortably the simplest thing in the world. Our guiding principle is always “People first”, and that’s reflected in all of our products. Something that’s particularly noticeable in Savo 360.

Savo 360 stands for high flexibility during the working day and is designed to promote movement. It’s also available with a writing pad that can be rotated 360 degrees, both around the chair and its own axis. Savo 360 has a long lifetime because the chair can be updated instead of replaced when it becomes worn.

PUSHING THE SEATING EXPERIENCE

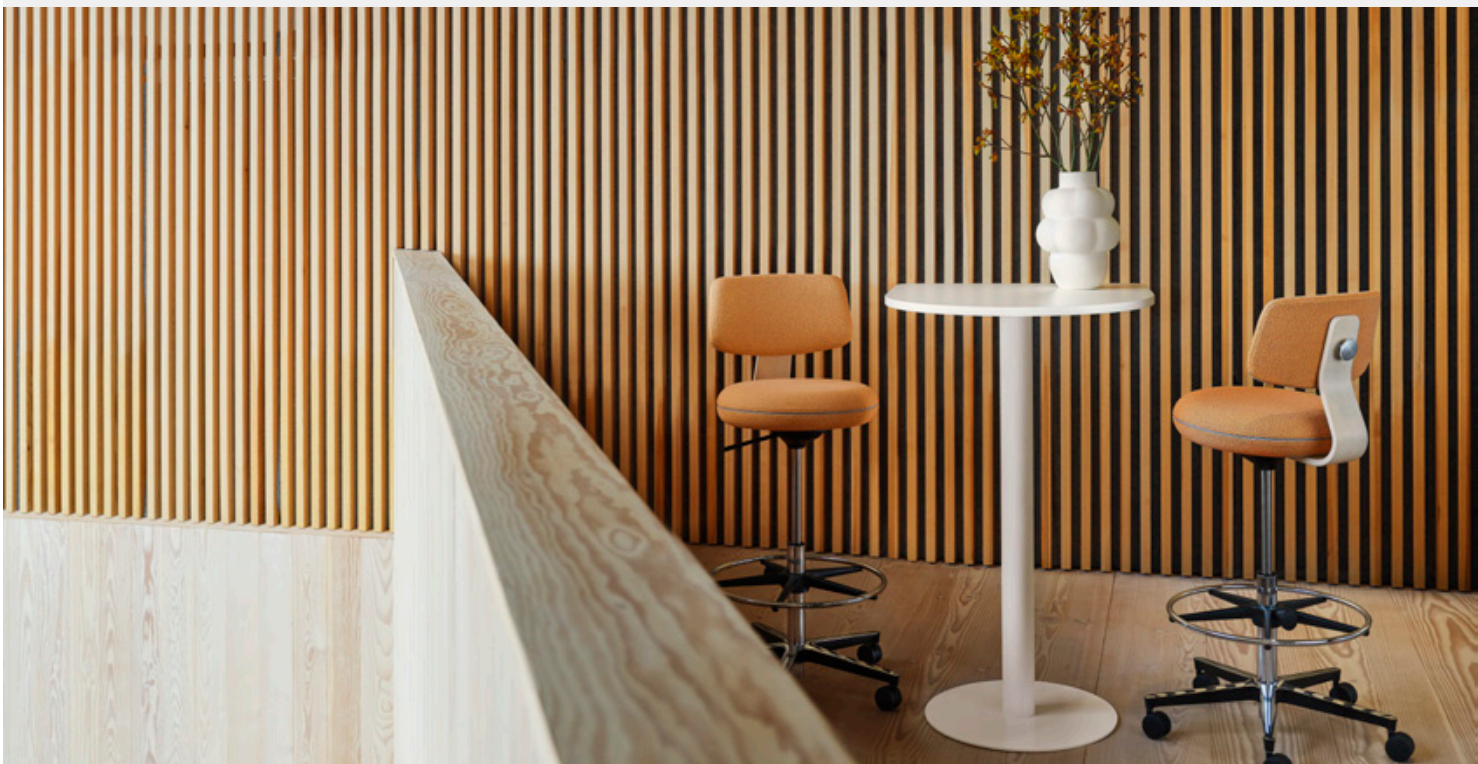

DESIGN BY  
**OLLE LUNDBERG**

This is an intuitive chair with a Scandinavian design with a focus on details that improve function and aesthetics. Savo 360 challenges the way a flexible office chair should look. This is an intelligent and intuitive chair where the ergonomics are built in through the flexibility of the wood, which provides immediate comfort. The integrated oak or ash components also create a living and natural impression that makes the chair stand out and have an impact on its surroundings. With the option to choose the colour of both the wooden parts and upholstery, Savo 360 is easy to adapt to every environment.

- Choose one or two fabrics from the same family for the seat and back
- Zips available in a contrasting colour
- The wooden sections are available in any colour you prefer
- Combine contrasting wooden details

*Olle Lundberg began his career as a designer in the late 1980s. He studied industrial design at University College of Arts, Crafts and Design in Stockholm, the University of Essen and at ENSCI-Les Ateliers in Paris. He has run his own design bureau, LundbergDesign, since 1990. His design projects for both national and international clients are multi-faceted and broad-based. Over the years, LundbergDesign has been presented with several international design awards such as the RedDot and IF awards.*

## SUITABLE FOR ALL SPACES

Savo 360 is exactly what you'd want it to be; an office chair, meeting chair, a chair for the reception area or a seat for a co-working space. It's an item of furniture that's very easy to position in different environments and which grows with the room by giving the environment that little extra. The secret is this chair's flexibility

– both in use and in terms of its appearance. Integrated parts in natural wood immediately give life to the environment. Its convenience, practical size and high levels of ergonomics make it ideal for most offices. The option to style the chair's upholstery means it can blend seamlessly into the majority of homes as well.

- Conference rooms
- Meeting rooms
- Reception
- Lounge
- Lobby
- Coworking spaces
- Educational spaces
- Home office

## SUSTAINABILITY

Savo drives the development of sustainable office chairs through innovative products with a long technical service life. The high quality we always provide makes our products the sustainable choice. We are constantly reducing our environmental impact by using materials, energy and resources in efficient, climate-smart ways.

As one stage in our overall sustainability process, the chair consists of 68% recycled and renewable material. The wood is FSC® certified (FSC-C009111) which means that it comes from responsibly produced forests.

The circular, “layer by layer” design means that all parts are separable and repairable, which makes it possible to update the chair over time or to recycle the material. The chair’s practical size also means it takes up less space during transport than many other classic office chairs.
