

6 Steps to prepare your workplace for re-entry

Intro

Recent months have demonstrated how we are now able to work from home. Technology has helped us to keep in touch, have meaningful meetings and **complete tasks efficiently**. **It can be argued that we've been able to do this with a reasonable level of productivity.**

For many of us, the benefits of avoiding our daily commute and spending time with family has enabled us to reconnect to what's important. We believe that 'Working from Home' is here to stay and will prove to be an integral part of a flexible approach to work moving forward.

At EFG we have missed the workplace so much. Being together as a team, collaborating, getting creative and having fun! We miss the variety that moving between home and work provides us and that feeling of going home at the end of a great week at work.

Key Benefits of Re-Entry

The sooner we return to the office the better for us as individuals, teams and organisations:

- Human connectivity brings huge benefits to our wellbeing
- Collaboration drives results that are so much harder to replicate over a screen
- The physical movement within the modern workplace brings both health and learning enhancement
- Purpose is provided by working together with a sense of direction and community
- Innovation and creativity accelerate when we're together
- Energy levels are enhanced through interactions we have and ideas shared
- Engagement levels improve beyond the tangible, with less distraction and a higher degree of productivity
- Empathy, trust, culture and support are all enhanced with physical presence

6 Steps to Workplace Re-Entry

We want you to return to the workplace quickly and safely, providing security and certainty for colleagues without having to overwhelm your space with screens.

We believe that it's about implementing beautiful and intelligent design that is flexible and sustainable for the future. In line with this we are sharing with you, the 6 steps used by our own design team to achieve effective re-entry schemes across the UK.

Distance
Creating a safe distance between furniture

Flow
Implement one way systems

Hygiene
Add in welcoming sanitation stations

Shelter
Use screens for added certainty in areas of contact

Digitise
Embrace technology & connect

Flex
Support WFH & Office Scheduling

We hope that this inspires you to think about your own workplace transformation and are here to support you as you prepare your offices for re-entry.

Distance

Flex

Digitise

Hygiene

Flow

Shelter

Entrance

Exit

Office Layout

Before

- Inadequate distancing in workstation, collaboration and breakout areas
- Face-to-face desk configurations
- Overcrowded meeting rooms

Office Layout

After

Functional barriers
Storage units with planters
work as physical barrier
between teams.

Redesigned desk
configurations to provide
additional protection

Reduced occupancy in
meeting rooms.

Sanitisation stations in key
areas.

Redesign of soft seating &
collaboration areas to allow
smaller groups of people
working together at the
same time.

Office Flow

Before

Overflow of space users in certain areas such as:

Reception and entrance

Main office corridors - people potentially meet face to face

Entry and exit from open collaboration areas

Print station

Canteen and break out area

Office Flow

After

Introduction of one-way circulation

Different entry and exit points avoid congestion and potential collisions.

Entrance

New furniture layout to support and encourage social distancing.

One-way circulation avoids congestion in key areas such as the entrance and around the reception counter.

Introduction of sanitisation stations.

Before

After

Workstations

Checkboard desk configuration allows people to keep the adequate distance with each other and avoids employees working face to face.

Additional desk screens, including return screens, enhance protection.

Biophilic Elements

- Improve air quality
- Boost employee wellbeing

Before

After

Checkboard

Eco Shield

Temporary cardboard desk screens provide extra protection and can be easily recycled or stored when no longer required

Workstations

Single desk re-configuration improves social distancing between employees

Floor standing screens offering added privacy and peace of mind.

Functional barriers, such as storage units dictate the flow of the space in key areas.

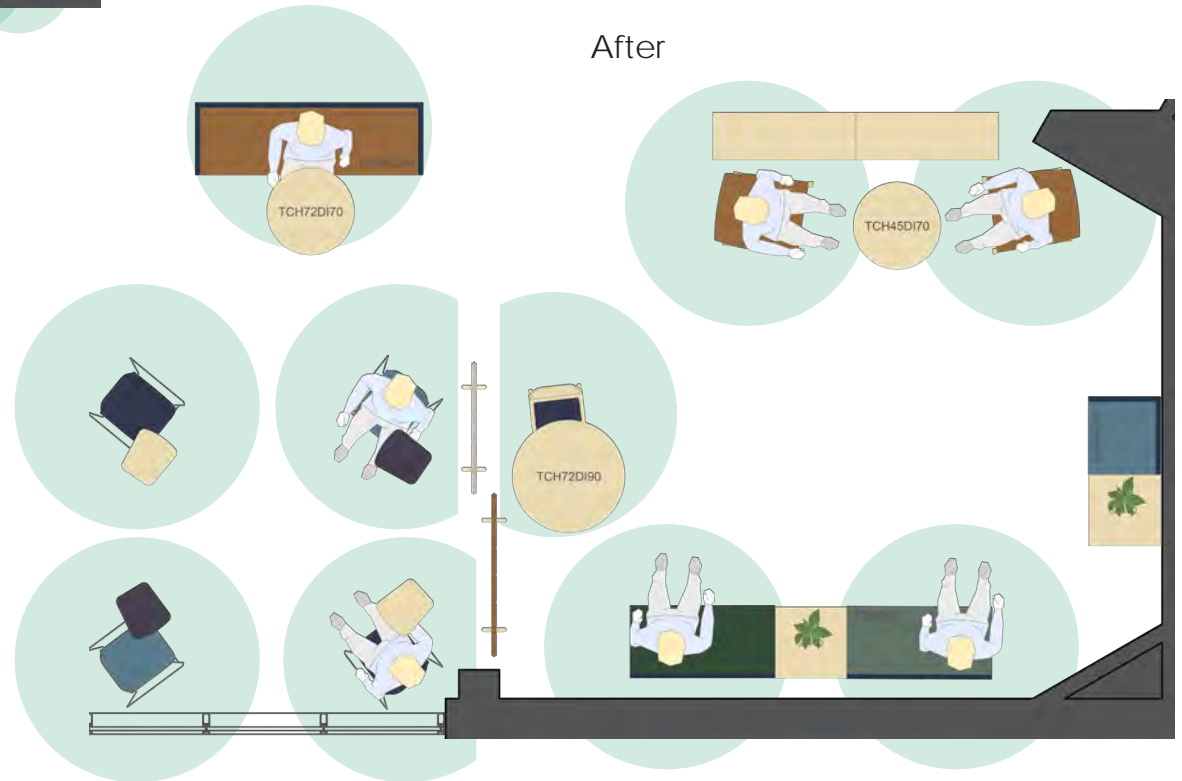

90 degrees

Breakout

Reducing and Re-configuring existing furniture keeps an adequate distance between employees.

Small clusters of individual seating form safe interactions.

Floor standing screens and storage units are used to define areas, support the one-way flow system and enhance protection overall.

Breakout

Modular seating is reconfigured to form individual seats

Floor screens enhance protection within the space.

Space re-design allows smaller group interactions, keeping safe distance.

Meeting

Reducing capacity creates a safe distance between meeting room users.

AV technology supports video conferencing and distance collaboration between teams.
